About us

Infimind Institute of Skill Development (IISD) was incorporated on 19th April 2017 and started operations on 1st January 2018 as LLP. However, owing to its growth, IISD transformed into a Private Limited company on 13th March 2020. Head Quartered in Bengaluru, Karnataka. We are a young organization evolved with a commitment to deliver skill development courses, corporate trainings and offer consultancy services that transforms both individuals and organizational business practices.

Mission

Our mission is transforming young minds through affordable skill-based integrated learning experience and enabling organizations to enhance their process and performance through insightful management consulting with an element of human touch and high proficient values.

Vision

Our vision is to continue to impact the advancements of individuals and organizations by delivering excellence through skill development, training, and management consulting in India.

Advantages of Java Programming?

✓ Java was designed to be easy – easy to write, easy to compile, and easy to debug

✓ The language is independent of the platform – you can run the same program on many different systems. Java is platform independent at the source level as well as the binary level.

✓ Java is an Object-Oriented Programming (OOP) language – it enhances the flexibility, and the re-usability of the code.

✓ Java programs are economical to develop and maintain.

✓ It's a secure language – It reduces the security threats by avoiding the use of explicit pointers.
